PROFILE

AI & Automation Lead at EPA.Digital, a Mexican performance-marketing agency of about 200 people. 10+ years in marketing and 7 in data: I started in account management, moved through analytics and CRO, became a data manager, and since 2024 I've built the AI systems the account teams use (MCP servers, RAG, agents and dashboards on Google Cloud). I lead one AI developer and have led development, CRO and measurement teams on specific projects.

EXPERIENCE

EPA.Digital · Mexico City

Jul 2017 – present

AI & Automation Lead

Sep 2024 – present

- **Osaka, media MCP server.** Built the first version alone in 2025 (FastMCP on BigQuery) and now serve as product owner of the production version (TypeScript, Hono, Cloud Run, OAuth for Claude.ai): designed much of the app, decided which features went in and contributed the DV360 provider and MCP authentication. A developer on my team wrote about 80% of the code. 47 active users query Meta, Google Ads, GA4, TikTok, Bing and DV360 with it (admin dashboard, Oct 2026). Led a quality diagnosis on 484 real conversations.
- **Prompt Library.** Designed and built the agency's prompt and automation repository (Next.js, Firestore, Cloud Run), opened to the 170 people EPA had at launch. 38 active users in 30 days, 44 resources and 0 USD a month to run (admin dashboard, Nov 2026).
- **Hopper.** Designed and built the QA portal for dashboards. Every bug used to cost me a call; now Gemini does the triage and classification, code reads the real figure and a prioritized GitHub issue opens. 149 reports from 9 people (Hopper dashboard, Nov 2026).
- **Einstein.** Set the architecture, permissions and roadmap of the RAG knowledge base with an MCP connector (FastAPI, React, Qdrant, Claude on Vertex AI), as product owner; a developer on my team built it.
- **Live GEO demo.** Wrote it end to end for Google Señales (March 2026, 30 people): my own RAG with embeddings, similarity search and citations (Next.js, Gemini, Cloud Run).
- **Client dashboards.** Co-developed SKU dashboards and ETL on Cloud Run for several clients; for one of them, daily analysis went from a full day to about 30 minutes (my own estimate).
- **Claude Code plugins.** Built the agency's plugin marketplace: a fixed stack for dashboards, BigQuery conventions, Cloud Run deployment and protective hooks.
- **Training and talks.** Internal courses on prompting, AI Fluency and dashboards with Claude Code; a GEO course at Universidad Panamericana; talks at Google Señales and Growth Stack Sessions.

Data Manager

Sep 2020 – Sep 2024

- Designed the agency's central media database on BigQuery and helped build an in-house Supermetrics replacement (Apps Script and Cloud Functions), the origin of the data platform the agency uses today.
- Standardized client analysis in R and Quarto, and automated Google Ads with human approval in Sheets for keywords and search terms.

CRO & Data Analytics Lead

Jan 2019 – Sep 2020

- Created the agency's CRO program with a team of three (UX, development and analysis) and worked with the Marketing Director on KPIs and automated reporting in R.

Digital Marketing Analyst · Account Executive

Jul 2017 – Dec 2018

- Managed campaigns on Google, Facebook and Bing; analyzed data with Google Analytics and R; wrote Google Ads scripts.

PERSONAL PROJECTS

I build agent apps for fun. Some, such as **Iterum** (travel), **Domi** (apartment hunting in Mexico City) and **Vocatio** (job search), are deployed on Cloud Run on top of **Fundamentum**, my Python chassis with ADK, Gemini and Claude on Vertex AI, cost tracking in BigQuery, guardrails and evals. Case studies at josecarloscorona.dev; chassis code at github.com/Metuendus/fundamentum.

SKILLS

AI: MCP, Claude and OpenAI SDKs, Gemini, Vertex AI, Google ADK, RAG, LangGraph, evals, Claude Code

Data: SQL, BigQuery, ETL, Python, R, Firestore, Looker Studio

Development and cloud: TypeScript, Next.js, React, FastAPI, Cloud Run, Cloud Build, Terraform

Media: GA4, Google Ads, Meta, TikTok, Bing, DV360

EDUCATION AND LANGUAGES

B.A. in Business Administration, UNAM (National Autonomous University of Mexico), School of Accounting and Administration, graduated 2016

Certifications: Google Launching into ML and Prompt Design in Vertex AI (2024); DataCamp Data Analyst with Python (2022)

Languages: Spanish (native); English (upper intermediate, B2)
